

CAPS “The Common Automotive Platform Standard”

Claims Analysis Report
Wk. Ending 6/03/2021

www.caps.co.uk

(Author - Kevern Thompson)

Claim Definition (CAPS Analysis)

Unique Claims

A claim that is initiated and exchanged for the first time within the CAPS System “The primary count”

Supply Chain Transmissions

The Unique Claim plus any additional transmission on the same exchanged claim, e.g. notification to a parts Vendor

Information enclosed is CAPS data exchanged across the platform, which may be similar to claim trend data throughout the UK

CAPS “Weekly” exchange synopsis

This new weekly report will show claim volume trends from the beginning of lockdown 2.0 and through LD 3.0 as a percentage of claims measured against the peak, Wk. ending 07-11-20

The analysis will reveal throughout Jan, Feb and into Mar-21 a return to operational activity, where the statistics display a slight change to previous weeks pattern of ebb and flow, last week showing a flat line of data exchanged from the previous weeks exchange.

Some of the factors reported to be causing fluctuations are;

- Bodyshops reporting continued reduced in workforce due to flexi-Furlough

- Schools only starting back again week beginning 08/03 *(May see an increase next week)*

- CAPS Measures claims exchanged and not necessarily the frequency of “New Claims” indicating a weekly lag between newly reported Vs exchanged claims?

Regional Measurement analysis using the UK Postcode regional database by identifying each Bodyshop location exchanging data.

Unique & Transmissions

Unique Transmissions

Lockdown Period 2.0

Lockdown Period 3.0

Claims Volume Analysis Week Ending 06/03/21

Measurement against (Wk. End 07/11/20) exchanged peak;
